Aspiring Software Developer

ABOUT ME

I am an ambitious and dedicated individual deeply passionate about programming and data science. With expertise in Python and its libraries, I excel in data analysis and machine learning. My inquisitive nature drives me to explore computer vision projects using OpenCV. I also enjoy developing interactive web applications with JavaScript and HTML/CSS. Committed to continuous learning, I thrive on challenges and strive to make meaningful contributions through innovative projects. Let my projects speak for my skills and determination to create impact through technology.

PROJECTS

Bellabeat Product Analysis

A data analysis case study focusing on real-world tasks of a junior data analyst.

Document Scanner with OpenCV

Developed a document scanner using OpenCV to obtain a top-down view of documents.

Data Structures and Algorithms Collection

A collection of basic data structures and algorithms implemented in C and/or Python.
